

FAQ for GP2 Members applying to MJFF DEI RFA

Q. Are GP2 members and investigators eligible to apply to the MJFF DEI RFA?

A. Yes, GP2 members and investigators working with underrepresented populations (defined in the “RFA Overview” document) are eligible to apply to the MJFF DEI RFA.

Q. Can GP2 members and investigators apply for supplemental funding to their GP2-funded projects?

A. GP2 members and investigators may apply for supplemental funding for cohorts and clinical datasets that contribute to GP2, if the proposed project meets the goals and falls under the priorities outlined in the MJFF DEI RFA. This supplemental funding can be used to expand the depth of the clinical dataset proposed for inclusion in GP2 (i.e. [Minimum Plus -> Core](#)) with a strong rationale.

Q. Can GP2 members and investigators apply for funding for projects that are independent of GP2?

A. Yes. GP2 investigators may apply for funding for projects completely outside of the current remit of GP2, using their current cohorts and/or new proposed cohorts.
